## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 6, 7, and 8 it is unclear what is meant by the term "wound around said polepieces." It is not clear by the drawings how the coil is wound on the pole pieces. The drawings show that the coil is wound on a bobbin.

In light of the above informalities, the claims have been examined as could best be understood by the examiner. The examiner's failure to apply prior art to any of the claims should not be construed as an indication of allowable subject matter.

### *Drawings*

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the coil wound on the polepieces must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

*Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nehl et al.

Nehl discloses a valve comprising:

- Two pole pieces 122, 136;
- An electric core 130;
- A bearing 100;
- A gap Fig. 2;
- An armature 146;
- A shaft 96;
- Gap filled with air;
- The armature is frusto-conical;
- Attachable to a device providing for linear actuation; and
- Use in an internal combustion engine.

Nehl's bearing is disposed in one of the pole pieces. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to move the bearing up to be disposed in the pole piece, since it is held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70. Also, since applicant has not disclosed that having

the having the bearing disposed in *one* of the pole pieces solves any stated problem or is for any particular purpose and it appears that the bearing disposed just below one of the pole pieces would perform equally well.

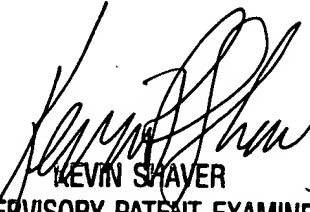

### *Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Austin Bonderer whose telephone number is 703.306.5911. The examiner can normally be reached on Monday- Thursday.
